

Maths Workshop for Parents

Thursday 2nd October 2008

Aims of session

- To give a brief overview of the Renewed Framework for Mathematics.
- To understand the progression in **multiplication** and become familiar with the grid method.
- To understand the progression in **division** and become familiar with the chunking method.
- To 'have a go' at using these methods for yourselves!

18 evaluation questionnaires were returned
(1 parent = approx 6%)

Do you now feel more confident to support your child with the grid method for multiplication?

100% of parents said yes.

Do you now feel more confident to support your child with the chunking method for division?

67% of parents said yes.

33% said they felt a little more confident.

Excellent handouts which I can refer back to!

The methods were very clearly explained and easy to understand.

It was great knowing I wasn't the only one!

It was very relaxed and easy. Excellent idea - more please!

I now feel more confident to help my child at home.

It was great having practise time to try out examples ourselves.
